Education

Gisma university of applied science, BS in Computer Science — March 2025 – April 2028
British school in Baku, high school graduation — September 2019 - June 2024

- GPA:4.9 (https://bsb.edu.az/)
- **Career Goal:** Pursue a Master's degree in Cybersecurity and Forensic Science.

Experience

VOLUNTEER, AT THE COP-29 ESSAY/ART COMPETITION and SPORTS DAY — November 2024– October 2024
organized by IAA with the support of the Indian Embassy– Baku, Az

- As a volunteer in the Essay Competition, I helped with event operations by welcoming the guest, guiding them, managing supplies, coordinating services, and handling communications, which honed my organizational and communication skills and deepened my passion for technology and community involvement.
- I served as assistant coach for the basketball game, helped with food distribution, and participated as a member of the BSB Basketball team while mentoring them to victory.
- This experience has deepened my understanding of the qualities of a good leader, the importance of motivation, team work, and networking.

MEMBER OF THE MUN ORGANIZING TEAM,BSB SCHOOL IMUM – Baku , Az — October 2023– October 2023

- As an organizer in my school's Model United Nations, I managed many things to ease the burden of the secretariat.
- I contributed to managing the MUN's decorations and help maintain discipline .
- Furthermore, I played a role in logistics, carefully maintaining the coordination of food services and venue tidiness, along with ensuring the smooth flow of proceedings.

Intern, Yapi Kredi Bank Azerbaijan Baku Economic Zone, Azerbaijan,Baku Economic Zone, Azerbaijan — August 2025 – September 2025

- Worked closely across cross-functional departments including management, credit control, risk management, and finance teams.
- Gained hands-on exposure to banking operations, risk assessment workflows, and financial team structures.

Projects

Python calculator

- created and arithmetic calculator.
- Tools Used: Python

Secure Password Manager

- password manager application.
- Tools Used: Python (flask)

Computer Networks Project

- Developed a secure messaging platform featuring a Graphical User Interface (GUI)

Gomoku Agent

- Built a compact AI agent capable of playing the game Gomoku.

Machine Learning Project

- Developed a credit risk prediction model to forecast loan defaults.

University Database

- Designed and implemented a comprehensive university database system..

Statistical Analysis Report

- Analyzed and determined the validity/accuracy of CVSS (Common Vulnerability Scoring System) scores.

Network Dump Analysis

- Conducted deep-dive analysis of network traffic dumps using Wireshark.

Portfolio Scratch Mini-Game

- Built an HTML/CSS computer portfolio and an interactive Scratch game where goalkeeper speed scales dynamically with your score.

Technical Skills Technologies

Languages: Python, HTML, CSS, JavaScript, C, Java, R, SQL, Bash (Linux Shell), Scratch

Tools Frameworks: Git GitHub, LaTeX, Jupyter, Flask, Wireshark, Linux Shell.

Core Computer Science Concepts: Data Structures Algorithms, Computer Networks, Operating Systems, Databases Big Data, Cybersecurity Basics, Artificial Intelligence Machine Learning Basics.
